

GEORGIA HIGH SCHOOL SUSTAINABILITY CONTEST

QUICK START FOR TEACHERS

CORSAIR is sponsoring a Georgia high school sustainability design contest. Students study a CORSAIR product's repairability and pitch or design a fix — and can win prize packages for themselves, their advisor, and their school.

Two Tracks — Students Pick One

Track 1: The Repairability Lab	Track 2: Pitch the Fix
Teardown, audit, and a written redesign proposal, plus a prototype/mockup. Best for hands-on, methodical students.	A 90–120 second video pitch of one sustainability fix, Shark Tank–style. Best for confident communicators.

What's in the Toolkit

- Resource Guide — full program details, both tracks, prizes, FAQ
- Presentation Deck — show this to introduce the contest to students
- Judging Rubric — scoring criteria for both tracks
- Classroom Lesson Plan — day-by-day plan for either track

3 Steps to Get Started This Week

1. Show students the Presentation Deck and let them choose a track and teammates (1–4 students, 1 faculty advisor).
2. Hand out the Judging Rubric so expectations are clear from day one.
3. Pick a start date from the Classroom Lesson Plan and block the class time you'll need.

Key Dates

Registration Opens	October 14 th , 2026, Noon
Submissions Due	February 19 th , 2027, 11:59pm
Awards Ceremony	On or around Earth Day 2027
